WODONGA'S VISION FOR THE FUTURE

An important component of the MSS is the expression of the long term vision for the municipality. The vision statement is designed to reflect the broad goals and aspirations for future land use and development. It builds upon the key issues identified and the corporate direction established for the future by the Wodonga Council.

The Strategic Land Use Vision for Wodonga is:

“To continue to develop as a regional city offering a high quality lifestyle to our community and be the most prosperous and dynamic regional centre of inland Australia”.

To achieve this vision, key strategies will concentrate on increasing the quality of life for residents ensuring high environmental standards are applied to development, the pursuit of economic development initiatives and diversification of the industrial base.
